

CHAMPION #AC120 SUPERBRUTE MAGNETIC DRILL PRESS

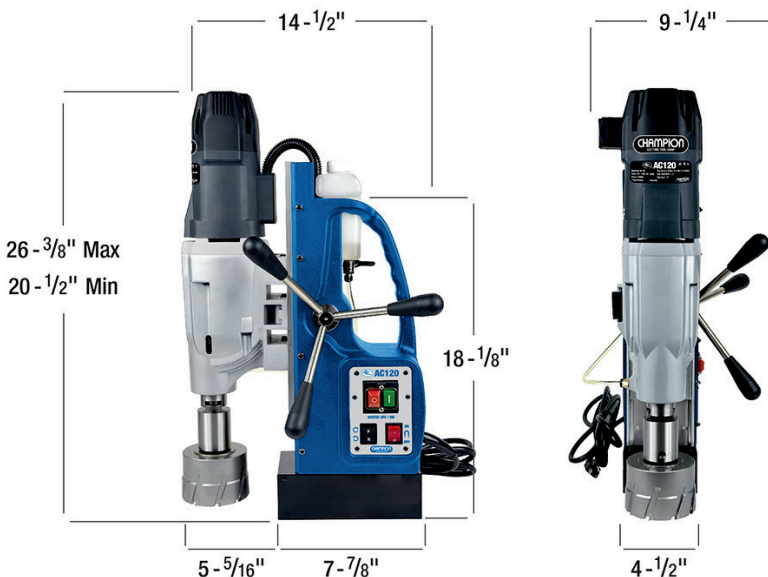

The Champion AC120 SuperBrute Magnetic Drill Press is a heavy-duty industrial mag drill designed for rigorous steel drilling, tapping, reaming, and countersinking where strength and torque are paramount. Driven by a powerful 1700 W motor with variable speeds, the AC120 delivers exceptional cutting performance across a range of materials and tooling demands. Its 5,280 lb magnetic holding force provides outstanding stability on large steel surfaces, minimizing chatter and enhancing accuracy under load.

Built to accept 1-1/2" Weldon shank annular cutters, the AC120 supports large-diameter holemaking with impressive capacity, while the included accessories — such as a quick-change arbor system, twist drill chuck adapter, and external coolant setup — expand versatility for both annular and conventional drill bits. With its robust construction, high magnetic force, and adaptable controls, the SuperBrute is ideal for structural fabrication, industrial maintenance, and demanding field work where strength and reliability are essential.

What's Included with this Magnetic Drill Press?

- Carrying case
- 3/4" arbor
- 1-1/4" arbor
- Drill chuck
- handles
- Coolant tank assembly
- Safety strap
- Chip guard
- Hex keys
- Drift key
- Wrench

TECHNICAL ASPECTS

- Capacity: Up to 2-3/8 to 4-3/4" Dia, Up to 4" DOC
- Motor Power: 1700 Watt
- 4 Speed Motor - Speed 1: 35-115 RPM, Speed 2: 70-210 RPM, Speed 3: 80-250 RPM, Speed 4: 140-450 RPM
- Magnetic Strength: 7200 lbs
- Includes Drill Chuck - Use With Twist Drills, Reamers, Countersinks (Up to 1-1/4" Dia)
- Accepts MT3 Twist Drills & Reamers
- Drill Large And Deep Holes In Steel Plate, Structural Steel, Pipe
