

CHAMPION #AC42 VARIBRUTE MAGNETIC DRILL PRESS

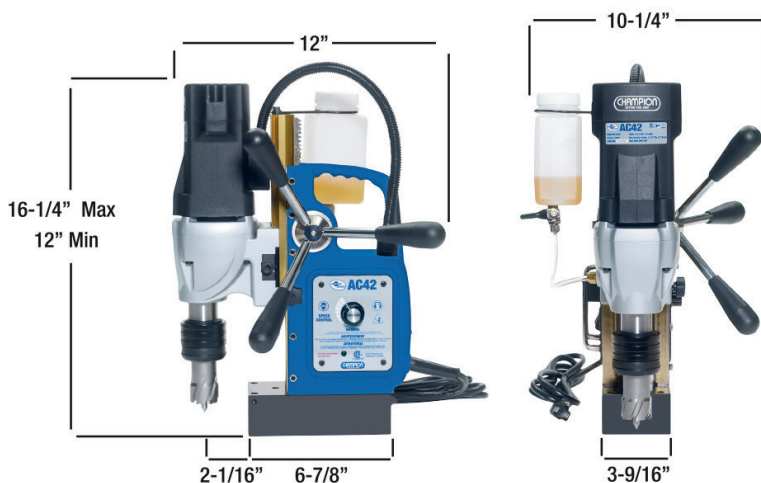

The Champion AC42 VariBrute Magnetic Drill Press is a versatile industrial mag drill engineered for heavy-duty drilling, tapping, reaming, and countersinking applications. Driven by a powerful 1100 W motor, the AC42 delivers controlled performance across its variable-speed range of 225–450 RPM with reversible rotation, making it ideal for both drilling and tapping operations. Its robust 3800 lb magnetic holding force ensures stable positioning on steel surfaces during demanding cuts.

Designed to work with a wide range of tooling, the AC42 supports annular cutter capacity up to 1-1/2" diameter with 2" depth, a 1" twist drill capacity, and a 3/4" tap capacity. The quick-change arbor accepts standard 3/4" Weldon shank cutters, while included accessories such as a quick change arbor, drill chuck adapter, and tap chuck expand versatility without extra purchases. Lightweight at approximately 29 lb, this mag drill is easy to reposition on job sites or shop floors without sacrificing industrial capability.

What's Included with this Magnetic Drill Press?

- Carrying case
- Quick release arbor
- Drill / Chuck adaptor
- Tap chuck
- Coolant tank assembly
- Safety guard
- Safety strap
- Hex key

TECHNICAL ASPECTS

- Capacity: 1-1/2" Diameter, 2" Depth of Cut
- Weight: Only 29 lbs
- Motor Power: 1100 Watt
- Motor Speed: 225-400 RPM variable speed / reverse
- Magnetic Strength: 3800 lbs
- 5 Cutting Operations - 1 Mag Drill
- Use With Annular Cutters, Twist Drills, Reamers, Taps, And Countersinks
- Quick Change Fast, Productive Cutter Change
- Engineered For Heavy Duty Use
